

# Tonik EV Charging

Powered by:

Component	Electric Vehicle Charger
Manufacturer	EO Charging
Model	EO Mini

Product specification:

About			
Founded in 2014, EO Charging’s aim is to create a safer, healthier, friendly planet – with superior quality Electric Vehicle Charging solutions being at the heart of what they do.			
Benefits			
<ul style="list-style-type: none"> <li>• Smallest fast charger on the market – meaning it doesn’t impact the aesthetics of your home</li> <li>• Comes with a universal socket to work with any Electric Vehicle</li> <li>• Designed and built specifically for charging at home</li> <li>• Accredited by OLEV (Office for Low Emission Vehicles), meaning it is eligible for the Home Charge Grant (£500)</li> <li>• Can be installed outside / weatherproof</li> </ul>			
Performance & Warranty			
Product Warranty	36 months	Rated Current	Up to 32A (1-Phase)
Socket Type	Type 2 (universal)	Charge Protocol	Mode 3
Physical Properties			
Dimensions (H x W x D)	175mm x 125mm x 95mm		
Weight	<5kg		
Operating Temperature	-10°C to +45°C		
Operating Humidity	95% Non-Condensing		
Enclosure Rating	IP45		
Rated Voltage	230 VAC Single Phase		

Earth Leakage	Type-A RCD Protection
Standby Consumption	3W
Standards Compliance	LVD 2014/35/EU; EMC Directive 2014/30/EU; CE Certified

### Tonik rationale:

EO Charging are manufacturers of high quality and reliable Electric Vehicle Charging solutions. Their EO Mini product is intentionally designed to be compact and blend discreetly in to the surrounds of your home – meaning you can charge your car up with 100% renewable energy from Tonik, but without the need for an eyesore of a home charging unit to do so. The ‘Mini’ comes in at a reasonable price too, thanks to EO’s clever and efficient design – and as the EO Mini is an OLEV certified charger, it’s eligible for a £500 grant to bring costs down further.
